Customer Reviews

The 23 Dongfeng Fengshen E70 is a highly regarded new energy vehicle. Against the backdrop of current policy incentives for new energy vehicles, E70 is highly favored by consumers for its excellent range performance and reasonable configuration. The appearance design of the E70 follows the design language of the Dongfeng Fengshen family, showcasing both fashion and stability. The body lines are smooth, with a large grille and sharp LED headlights on the front face, Make it appear highly recognizable on the road. The compact body size provides passengers with comfortable seating space, suitable for urban driving.

There are two versions of electric motors available for power performance, with a power output between 110 and 120 kW. The vehicle is equipped with an excellent electric power system, which provides responsive driving and excellent acceleration performance. As a pure electric vehicle, its zero emission characteristics are also in line with current environmental trends.

The range is equipped with a high-performance battery pack, providing a longer range. Depending on the configuration, the range ranges from 330 to 433 kilometers, which can meet the needs of daily commuting and urban driving.

The spacious interior design is simple and practical. The seats provide comfortable support and provide a comfortable riding experience. The vehicle is equipped with a series of luxury features and intelligent technologies, such as multimedia infotainment systems and intelligent driving assistance systems, which enhance the driving and riding experience.
